### EXPLANATION OF RELEVANCE

References AA and AL-AO were cited during the prosecution of a corresponding European patent application by the European Patent Office. All of these references, except reference AN, are in English, so no further commentary on their teaching is required. An English-language abstract for reference AN has been provided, and a full translation will be produced at the request of the Examiner.

The filing of the present Information Disclosure Statement is not to be construed as a representation that a search has been made, and is not to be construed as an admission that the information cited in the present Information Disclosure Statement is, or is considered to be, material to patentability as defined in 37 C.F.R. 1.56(b).

The above citation of related art is not a representation that such art constitutes a complete or exhaustive listing of all pertinent related art, nor that it necessarily includes the closest or most relevant art. The aforementioned citation comprises a voluntary citation of related art of which applicant and his attorney are presently aware and is not intended to serve as a substitute for the Examiner's own search.
